

## Meet Allie Curtis

*Associate Degree of Applied Science from  
Ozark Technical Community College  
Physical Therapist Assistant*

2.5 years with North Arkansas Regional Medical Center

**What made you decide to become a Physical Therapist Assistant?** In high school I was a part of the Harrison Chamber of Commerce's Youth Leadership Academy. Through that program we were able to shadow different areas of work throughout our community. One day we shadowed a PTA with Boone County Special Services. I loved seeing the PTA interact with the kids in a way that would improve how they function not only in the classroom, but in their daily lives as well. That's when I knew I wanted a career like that for myself.

**Specialty Area:** Pelvic Floor Physical Therapy

**Favorite Part of Being a Physical Therapist Assistant:** My favorite part of my career is getting to know my patients and to see them gain their quality of life back! Pelvic floor physical therapy can be a sensitive and sometimes delicate topic, however I strive to make my patients feel as comfortable as they can with me during the treatment process. Over the course of their rehab, I get to know some pretty incredible people who all have an array of different stories that led them to the clinic. I would love for pelvic floor physical therapy to become a widely known topic. Many individuals can take back control of their lives with the coordinated efforts of a specific plan of care as well as trusting the process.

**Fun Fact About Yourself:** My husband, Landon, and I were born and raised here in Harrison, Arkansas. We were high school sweethearts and have been married for 5 years! We love to travel as far as the road can take us, but also enjoy hiking and exploring here in our own backyard, the beautiful Ozarks! We now have a 4 month old little boy, Cal Riley, that we are so excited to take on these adventures with us!

*Physical, Occupational, and Speech Therapy*
